Why the presentation is the title page?

Presentation is a visual representation of the material you studied. How to fulfill the presentation on our own, we considered earlier. As a rule, it contains a minimum of text and a maximum of graphic material (pictures, tables, graphs, charts, diagrams). But then why then the title page?

Starting showing that you have worked there, it would be wrong. Next, at least, inform the listeners the topic of work. This topic is indicated on the title page. But for the presentation you ordered is perceived seriously, it is not enough to just write the topic in the middle of the slide. What should still be present in the first slide? The content of the title slide

The overall filling scheme of the first sheet of the presentation will look like this:

The name of the institution.

Project topic.

Performed - indication of the student's name, group, course.

Checked - indication of the FIO of the teacher, the position.

City, year of work.

Sometimes it is allowed when making the title list of presentation to exclude the first and fifth points listed, but 2, 3 and 4 points should always be present!

If your slides are numbered, then the number on the title page is not put, although the slide will be considered first. Further numbering will go from the second slide. Registration of title slide

All listed data cannot be reported on the title slide with solid text. There are defined data placement rules.

The name of the university is located at the very top of the slide with alignment in the center. Font size 18-20. Usually takes 2-3 lines.

The topic is posted in the center of the page. Visits larger font. You can dial with capital letters or use creative text formatting functions.

Performed and checked arranged under the right side, each other. Often the color of the font for these items on the tone is lighter than the one to whom the topic is typed.

The city and the year of performance are indicated by commas at the very bottom of the slide.

Alignment in the center.

What mistakes when making a title slide should be avoided?

And now let's call errors that should not be done when making the title slide presentation.

Grammar errors in the title. Be sure to check the slide for spelling errors and the locations. Their presence is able to spoil all the impression of your presentation.

Annoying design. Try to pick up neutral colors for presentation design and especially the first slide.

Unreadable text. Your text should be good to read with the go, so do not use the title slide with suitable fonts that are poorly read, design with double or blurred letters. Watch that the text does not merge with the background.

Distracting elements. These may be pictures or design elements. Watch that there are no too much. For some presentations (for example, to protect the graduation project), the presence of pictures is inappropriate, and the design should be selected with a minimum number of items.

As we can see, on this, it would seem, a simple stage, as the design of the title list of the presentation, too, can also be stumbled. But everything becomes easier when you know the actions algorithm and possible errors. We hope our article will help you to issue a title presentation slide right right.
